

ISU Horticulture Center
Presents:

AWESTRUCK: THE WONDER OF NATURE

Annual Themes

Each year, the Horticulture Center staff and volunteers develop an educational theme which drives the focus and programming of the Center. Past themes have included gardening techniques, unique plants, historical events, and the contributions of peoples and groups to the fields of horticulture and nature. The title for our 2024 theme will be Awestruck: The Wonder of Nature. **With this theme, we hope to encourage our guests to open their eyes to the wonders around them in the outdoors and inspire a sense of awe through over-the-top botanical, artistic, and natural displays at the Center. Further we hope to educate visitors about the benefits of these kinds of awe experiences.**
